To Whom It May Concern:

Ms. Candace Wanner (DOB: 06/07/1988). She sought treatment for a mental health-related disorder that can be found in the DSM-V. I'm familiar with her emotional-mental history and with the functional limitations imposed by this mental health-related disorder.

Due to this emotional disorder, Ms. Wanner has certain limitations coping with what would otherwise be considered normal, significant day to day situations, such as symptoms of anxiety (including, lack of interest in daily activities, worrying cognitions, nervousness, feelings of frustration and an inability to self soothe).

To help alleviate these challenges and to enhance her day-to-day functionality, I have prescribed Ms. Wanner to obtain two ESA Pets as her emotional support animals: a 12 lb Domestic Shorthair Tortie cat named Princess, whose presence mitigates symptoms of anxiety by offering soft, calming companionship and a steady routine to ease worry, and restlessness while helping her self-soothe, and an 8 lb Domestic Shorthair Tabby cat named Rosie, whose presence mitigates symptoms of nervousness by providing affectionate, consistent company and encouraging daily interaction to help with low energy, lack of interest, and emotional withdrawal.

I am licensed to practice therapy and to prescribe ESAs for treatment. My license number is MFT-46136 and it was issued in 2008. This letter should suffice as proof of treatment and certification of obtaining and keeping these emotional support animals. I prescribe that Ms. Wanner keep her Emotional Support Animals in her dwelling, in accordance with the Fair Housing Act and the Americans with Disabilities Act.

Sincerely,
Tina Logan, LMFT
