To Whom It May Concern:

Ms. Kaitlin McCormack (DOB: 07/29/1994). She sought treatment for a mental health-related disorder that can be found in the DSM-V. I'm familiar with her emotional-mental history and with the functional limitations imposed by this mental health-related disorder.

Due to this emotional disorder, Ms. McCormack has certain limitations coping with what would otherwise be considered normal, significant day-to-day situations, such as symptoms of anxiety (including persistent worry, emotional tension, difficulty maintaining calm and an inability to self soothe).

To help alleviate these challenges and to enhance her day-to-day functionality, I have prescribed Ms. McCormack to obtain Emotional Support Animals. Her ESA pets are two dogs:

Bleu, an American Terrier weighing 45 lbs, and Red, a Lab-terrier mix weighing 90 lbs. These animals are necessary for the mental health of Kaitlin McCormack, as each pet provides essential emotional support that directly addresses different symptoms related to her condition.

- Bleu (Dog – American Terrier , 45 lbs): Helps promote emotional steadiness by providing consistent companionship and reassurance. Additionally, Bleu supports relaxation and stress relief, primarily through petting.
- Red (Dog – Lab-terrier mix,90 lbs): Helps reduce emotional tension by offering calming interaction and a grounding presence. Additionally, Red supports emotional balance and calmness, primarily through petting.

I am licensed to practice therapy and to prescribe ESA for treatment. My license number is MFT- 46136 and it was issued in 2008. This letter should suffice as proof of treatment and certification of obtaining and keeping these emotional support animals. I recommend that Ms. McCormack keep her Emotional Support Animals in her dwelling, in accordance with the Fair Housing Act and the Americans with Disabilities Act.

Sincerely,  
Tina Logan, LMFT
