To Whom It May Concern:

Ms. Madeline J. Schroeder (DOB: 03/30/1989). She sought treatment for a mental health-related disorder that can be found in the DSM-V. I'm familiar with her emotional-mental history and with the functional limitations imposed by this mental health-related disorder.

Due to this emotional disorder, Ms. Schroeder has certain limitations coping with what would otherwise be considered normal, significant day-to-day situations, such as symptoms of anxiety (including, lack of interest in daily activities, worrying cognitions, feelings of frustration and an inability to self soothe).

To help alleviate these challenges and to enhance her day-to-day functionality, I have prescribed that Ms. Schroeder obtain an Emotional Support Animal. Her ESA is Wayne, a Cattle Dog weighing approximately 47 lbs. This animal is necessary for the mental health of Ms. Schroeder because its presence will mitigate the symptoms she is currently experiencing.

I am licensed to practice therapy and to prescribe ESA for treatment. My license number is MFT- 46136 and it was issued in 2008. This letter should suffice as proof of treatment and certification of obtaining and keeping this emotional support animal.

I prescribe that Ms. Schroeder keep her Emotional Support Animal in her dwelling, in accordance with the Fair Housing Act and the Americans with Disabilities Act.

Sincerely,
Tina Logan, LMFT
