To Whom It May Concern:

Mr. Casen Carpenter (DOB: 08/17/1993). He sought treatment for a mental health-related disorder that can be found in the DSM-V. I'm familiar with his emotional-mental history and with the functional limitations imposed by this mental health-related disorder.

Due to this emotional disorder, Mr. Carpenter has certain limitations coping with what would otherwise be considered normal, significant day to day situations, such as symptoms of anxiety (including lack of interest in daily activities, worrying cognitions, feelings of frustration and an inability to self soothe).

To help alleviate these challenges and to enhance his day-to-day functionality, I have prescribed Mr. Casen Carpenter to obtain two dogs as his emotional support animals, specifically a Husky named Khalessi that weighs 40 lbs, and a German Shepherd named Nash that weighs 80 lbs. These animals are necessary for the mental health of Mr. Carpenter because their presence will mitigate the symptoms he is currently experiencing.

- Khalessi (Dog – Husky, 40 lbs):  
Helps Mr. Carpenter feel more at ease when his thoughts keep running and bothering him, primarily through petting.
- Nash (Dog – German Shepherd, 80 lbs):  
Helps Mr. Carpenter feel less frustrated and more settled during the day, primarily through petting.

I am licensed to practice therapy and to prescribe ESAs for treatment. My license number is MFT- 46136 and it was issued in 2008. This letter should suffice as proof of treatment and certification of obtaining and keeping these emotional support animals in his dwelling, in accordance with the Fair Housing Act and the Americans with Disabilities Act.

Sincerely,  
Tina Logan, LMFT
