To Whom It May Concern:

Ms. Serena Perkins (DOB 1995-08-27). She sought treatment for a mental health-related disorder that can be found in the DSM-V. I'm familiar with her emotional-mental history and with the functional limitations imposed by this mental health-related disorder.

Due to this emotional disorder, Ms. Perkins has certain limitations coping with what would otherwise be considered normal, significant day to day situations, such as symptoms of anxiety (including, lack of interest in daily activities, feelings of frustration, worrying and inability to self soothe).

To help alleviate these challenges and to enhance her day to day functionality, I have prescribed Ms. Perkins to obtain two dogs as her emotional support animals, specifically two German Shepherds named Rex, that weighs 74 lbs and Roxie that weighs 60 lbs. These animals are necessary for the mental health of Ms. Perkins because their presence will mitigate the symptoms she is currently experiencing.

- Rex (Dog - German Shepherd, 74 lbs): Helps provide comfort during moments of anxiety, which helps reduce stress and restore a sense of calm, primarily through petting.
- Roxie (Dog - German Shepherd, 60 lbs): Offers grounding presence when she feels disconnected or overwhelmed, bringing her focus back to the present, primarily through petting.

I am licensed to practice therapy and to prescribe ESAs for treatment. My license number is MFT-46136. My LMFT license was issued in the state of California in 2008. This letter should suffice as proof of treatment and certification of obtaining and keeping an emotional support animal in her dwelling, in accordance with the Fair Housing Act and the Americans with Disabilities Act.

Sincerely,  
Tina Logan, LMFT
